

Software Fixes and Quick Changes

Build Order

Priority	Feature	Reason
P0	Job creation fixes	Admin needs accurate job details before creating or editing bookings.
P0	Sidebar navigation reorganization	Admin navigation affects daily workflow and should be cleaned up early.
P0	Duplicate booking from job view	Speeds up admin booking creation for repeat or similar jobs.
P0	Clock-in / clock-out fixes	Cleaners need a simple and accurate job start and completion flow.
P0	Time zone issue	Job times and clock times must match before relying on scheduling or payroll.
P0	Cleaner wallet update	Cleaner pay must update correctly after completed jobs.
P1	Cash jobs	Admin needs a way to handle cash bookings without taxes or Stripe.
P1	Cleaner contact client option	Cleaners need a way to notify clients about delays or job-related updates.
P1	Cleaner availability	Admin needs cleaner availability to support scheduling.
P1	Client profile improvements	Multiple addresses, secondary contact details, and multiple payment methods improve client management.
P1	Booking page updates	Airbnb and post-construction booking pages improve service-specific booking flows.
P2	Clock-out checklist and admin-managed checklists	Different service types need different completion requirements, but this can come after the core flow.
P3	Map links and copy address option	Helpful for cleaners, but not blocking the main job flow.
P3	Admin section cleanup	Combining related sections improves organization but is not urgent.

P0 - Build First

1. Add Apartment Number Field in Job Window

Area: Admin Side

Build requirements:

- Add a separate Apartment Number field in the new job window.
- Keep the apartment number separate from the main street address.
- Show the apartment number anywhere the job address is displayed.
- Make sure apartment number saves properly when creating or editing a job.

2. Remove Job End Date and Job End Time

Area: Admin Side

Build requirements:

- Remove Job End Date from the job window.
- Remove Job End Time from the job window.
- Keep only the job date and job start time.
- Use the cleaner clock-out time to track when the job actually ends.
- Clock-ins should be tracked separately as well.

3. Improve Job Time Input

Area: Admin Side / Booking Page

Build requirements:

- Replace the scrolling time selector with a keyboard-friendly time input.
- Allow admin/client to manually type the job time.
- Validate the time before the job can be saved.

4. Separate Full Bathrooms and Half Bathrooms

Area: Admin Side / Booking Page

Build requirements:

- Have one field for Full Bathrooms.
- Add one field for Half Bathrooms.
- Do not use combined bathroom values like 1.5 or 2.5.
- Make sure pricing can calculate full bathrooms and half bathrooms separately.

5. Sidebar Navigation Reorganization

Area: Admin Side

Build requirements:

- Reorganize the admin sidebar into grouped dropdown menus.
- Use these sidebar groups and menu items: Overview - Dashboard, Analytics, Calendar; Operations - Jobs, Requests, Wait Lists, Documents, Clients, Web Bookings, Leads; Staff - Employees; Inventory & Supplies - Inventory, Rag Wash; Sales & Marketing - Sales Leads, Promo Codes, Quotes; Finance - Payouts, Finances, Invoices, Bulk Charge; Admin - Settings, Training, Log Out.

6. Duplicate Booking From Job View

Area: Admin Side

Build requirements:

- Add a Duplicate Booking option inside the job view.
- Copy over all details from the original booking except date and time.
- Require admin to enter a new date and time before saving the duplicated booking.
- Do not copy payment status, completion status, clock-in data, or clock-out data.

7. Fix Double Clock-In and Clock-Out Flow

Area: Employee Side

Build requirements:

- Fix the clock-in flow so cleaners only need to press Clock In once.
- Start the timer immediately after the first Clock In press.
- Remove the second Clock In confirmation screen or button.
- Apply the same logic to Clock Out so cleaners do not need to clock out twice.

8. Fix Time Zone / Time Display Issue

Area: Admin Side / Employee Side

Build requirements:

- Review time zone handling for booking times, job times, clock-in times, and clock-out times.
- Make sure all displayed times use the same business time zone.
- Fix any mismatch between the booking time and the cleaner clock-in time.
- Make sure admin and cleaner views show consistent times.

9. Fix Cleaner Wallet Update After Job Completion

Area: Employee Side

Build requirements:

- Fix the wallet update logic after job completion.
- When a job is finished, the cleaner wallet should update automatically.
- Show the correct completed or pending amount depending on the payout process.
- Make sure the wallet amount matches the job payout rules.

P1 - Build Next

10. Cash Jobs

Area: Admin Side

Build requirements:

- Add a Cash Job option when creating or editing a job.
- Cash Job should be admin only.
- Cash jobs should not include taxes.
- Cash jobs should not require Stripe or online card payment.
- Admin should be able to manually mark the cash payment as received.
- Cash jobs should still appear in finance reporting.

11. Add Cleaner Contact Client Option

Area: Employee Side

Build requirements:

- Add a Contact Client or Chat option on the employee job page.
- Allow cleaners to message the client from inside the app.
- Allow admin to see the chat thread.
- Support basic updates, such as the cleaner running late.
- Keep client communication connected to the specific job.

12. Add Cleaner Availability

Area: Employee Side / Admin Side

Build requirements:

- Add Availability to the employee main menu.
- Allow cleaners to enter and update their available days and times.
- Allow admin to view all cleaner availability.
- Make availability easy to use when assigning or scheduling jobs.

13. Add Multiple Addresses Per Client

Area: Client Profile

Build requirements:

- Allow multiple addresses under one client profile.
- Allow admin to add, edit, and delete client addresses.
- When creating a job, allow admin to choose from the client saved addresses.
- Allow one address to be marked as the default address if needed.

14. Add Secondary Phone Number and Email

Area: Client Profile

Build requirements:

- Add a secondary phone number field to the client profile.
- Add a secondary email field to the client profile.
- Keep the primary phone number and primary email clearly separate from the secondary contact details.
- Show secondary contact details clearly inside the client profile.

15. Add Multiple Payment Methods Per Client

Area: Client Profile

Build requirements:

- Allow multiple payment methods under one client profile.
- Allow one payment method to be marked as the default.
- Allow admin or client to choose which payment method should be used for a job.
- Keep payment methods available unless they are removed.

16. Update Airbnb Booking Page Pricing

Area: Booking Page

Build requirements:

- Update the Airbnb booking page to use Airbnb pricing.
- Show cleaning frequency options on the booking page.
- Automatically adjust the price based on selected frequency.
- Show the discount before the customer confirms.
- Show the final booking total clearly.
- Apply frequency discounts: bi-weekly service / 2 cleanings per month = 8%; weekly service / 4 cleanings per month = 10%; 8 cleanings per month = 15%; 20 or more cleanings per month = 20%.

17. Add Post-Construction Booking Page

Area: Booking Page

Build requirements:

- Add a booking page or booking flow for post-construction cleaning.
- Price post-construction jobs at \$50/hr per cleaner.
- Save the service type as Post-Construction Cleaning.
- Keep post-construction pricing separate from standard residential and Airbnb pricing.

P2 - Build After Core Flow

18. Add Clock-Out Checklist

Area: Employee Side

Build requirements:

- Add a checklist to the clock-out flow.
- The cleaner should complete the checklist before the job can be fully finished.
- The checklist should be connected to the specific job.
- Prevent the job from being marked complete until required checklist items are completed.

19. Add Admin-Managed Job Checklists

Area: Admin Side / Employee Side

Build requirements:

- Add a checklist settings area on the admin side.
- Allow admin to create a checklist for each service type.
- Support different checklists for Residential, Deep Clean, Move-In, Commercial, and Post-Construction jobs.
- Allow admin to add extra checklist items to a specific job if needed.
- Show the correct checklist to the cleaner during clock-out.

P3 - Lowest Priority

20. Add Map Links and Copy Address Option

Area: Employee Side

Build requirements:

- Add map links to the job address on the employee side.
- Let cleaners open the address in Waze, Google Maps, or Apple Maps.
- Add an easy copy-address option.
- Make this available for assigned jobs and claimable jobs.

21. Remove Cleaner Ability to Log Their Own Rag Wash

Area: Admin Side / Employee Side

Build requirements:

- Remove or disable the cleaner-side rag wash logging option.
- Keep rag wash control on the admin side only.
- Allow admin to log rag wash for a cleaner when needed.

22. Combine Rag Wash and Wash Payouts

Area: Admin Side

Build requirements:

- Combine Rag Wash and Wash Payouts into one admin section.
- Keep the ability to manage rag wash activity.
- Keep the ability to manage wash payouts.

23. Combine Inventory and Cleaner Kits

Area: Admin Side

Build requirements:

- Combine Inventory and Cleaner Kits into one admin section.
- Keep inventory stock management and cleaner kit tracking inside the same area.
- Make it easy to view what supplies are available.
- Make it easy to view what supplies are assigned to each cleaner.

24. Combine Gift Cards and Promo Codes

Area: Admin Side

Build requirements:

- Combine Gift Cards and Promo Codes into one admin section.
- No need for separate sections.

25. Move Training to Admin Settings

Area: Admin Side

Build requirements:

- Remove Training as a main sidebar item.
- Add Training inside the admin Settings area.
- Keep training content editable from the admin side.
